

The world needs us now more than ever! For almost two decades, MindUP has been helping children develop the mental well-being and fitness necessary to thrive in school and in life.

MindUP training is designed to enable whole-school implementation and support long-term impact. All school personnel, parents/caregivers and the wider school community are involved to help develop a mindful culture where children can thrive and be happy. A school that commits to implementing MindUP understands the importance of creating a positive ethos built upon shared values, placing wellbeing at the heart of everything it does.
